CASE PACKER

FULLY AUTOMATIC TUBULAR BAG CASE PACKER FI-CHS

Fischbach Tubular Bag Case Packer Fi-CHS: Up to 80 bags per minute accessorized and packed.

FEATURES

> Packages all common bag types
> Pick and place technology gently handles bags and give the flexibility of handling many different bag sizes
> Compact modular design allows the machine to be optimally adapted to individual packaging requirements, while taking up a minimum of space
> Runs reliably at 80 bags per minute with only one operator, making the Fi-CHS an ideal enhancement to any tubular bag filling line
> Integrated capability to add nozzles to each case in one automatic operating cycle
> Change of format accomplished without tools in less than three minutes
> Automatic box closing and taping system
> Cutting edge process control allows trouble-free operation and intuitive operation interface.

OPTIONS

> Special parts robot
> Liner dispenser
